

TIKOS
BUSINESS SOLUTIONS

MultiScan (chip bulk recording) System requirements

TIKOS

- TIKOS version 2024.1

Client software

- Operating system Microsoft Windows 10™ or Windows 11™ – with the latest service pack and update.
- .NET-Framework 4.7.1 or higher
- Graphic card driver, recommended: Full HD solution (1920 x 1080)
- Optional touch screen

Installation

- Install exe
- Specify workstation settings
- Configure antenna

RFID

For processing in MultiScan we need the unique chip number of the manufacturer. This must be stored by the manufacturer in the EPC memory and the antenna must read the contents of this memory. The data can be returned via TCP/IP, serial or USB in the format chip number + CR/LF.
